

Marysville Public Schools

1st Grade

Power Standards

Sorting Things Out

- Objects can be sorted according to observable properties, such as color, shape, size, texture, sinking or floating.
- Materials can be sorted by their attraction to magnets.
- Water exists on Earth as a solid, liquid, and gas.

Weather Watchers

- Weather is described in terms of temperature, cloud cover, wind, and precipitation.
- Weather data collection tools are used to record temperature, precipitation, wind speed and direction.
- Weather changes with the seasons in Michigan.
- Safety precautions should be followed during severe weather events.

An Animal's Life

- All living things have an observable life cycle.
- Living organisms are diverse.
- Organisms have specific needs for survival and they find those needs in their habitats.
- Physical characteristics help organisms meet their needs in their environment.
- All organisms are part of a feed web.
- Humans are similar to other living things.
