

Marysville Public Schools

2nd Grade Science

Power Standards

Measuring Matters

- Common objects and substances can be described according to their properties.
- Objects and substances are measured using length, volume, and weight.
- Objects and substances are classified as single substances and mixtures.

Earth's Land and Water

- Describe major bodies of water and landforms that make up the Earth's surface.
- Describe how water flows downhill over landforms and pools to form bodies of water
- Identify sources and uses of water and how water can be protected and conserved.

A Plant's Life

- Plants are living things that have a life cycle and needs for life
- Plants need air, water, and light to grow and survive.
- Questions and investigations help us learn new things.
- Evidence helps us make scientific decisions.
