

Spanish II (Semester 3 and 4)

Course Description

The Spanish 3 and 4 high school curriculum continues to develop students' knowledge of the Spanish language and culture. Emphasis is placed on developing meaningful authentic communication in Spanish in a variety of contexts.

To develop language proficiency students communicate verbally and in writing through familiar topics focusing on themselves, and the world in which they live; which includes school and community. By engaging in meaningful communication students continue to become more familiar with Spanish life and culture and gain a better understanding of their role as a citizen in a global society.

Students broaden their cultural knowledge by exploring the regions of the world where Spanish is spoken with special emphasis on Cuba and other Caribbean and South American countries. Through new information and insights into cultures, customs and traditions of the Spanish-speaking world, students continue to demonstrate respect for other cultures and continue to recognize differences and similarities between their own culture and other cultures. Throughout the year, students continue learning how to communicate effectively in Spanish and demonstrate awareness of Spanish language and culture.
